

FOR IMMEDIATE RELEASE

## **GxFS High Voltage Rectifier Series**

**February 22, 2011 - Carrollton, TX** - Dean Technology, Inc. is pleased to announce the GxFS high-voltage rectifier product family. The GxFS series replaces the discontinued 20,000, 25,000, and 30,000 volt rated GxFP diodes. The GxFS products have an identical package size to the discontinued parts, and maintain the same electrical performance and specifications. The GxFS products will have a blue cathode band in place of a white wavy band previously used on the GxFP parts.

The GxFS product nomenclature allows for an easy transition by simply replacing the "P" with an "S" in the final character of the part number to designate the replacement product with the same electrical specification as the obsolete GxFP products. The parts being updated as of February 22, 2011 and their corresponding replacements are:

<b>Obsolete (GxFP) Part</b>	<b>Replacement (GxFS) Part</b>
G20FP	G20FS
G25FP	G25FS
G30FP	G30FS

Orders for the end of life GxFP series will be accepted from existing customers based upon current usage volume until June 1, 2011, providing ample time to evaluate your product requirements. Free samples of the new series of parts will be available to all existing customer for evaluation and approval. Please note that last time orders are non-cancellable and non-returnable to ensure an equitable capacity allocation of product.

Dean Technology strives to provide our customers with the highest level of service and will do everything possible to ensure continued timely delivery as well as aid in technical support during this product transition.

### **About Dean Technology**

Dean Technology, Inc. ([www.deantechnology.com](http://www.deantechnology.com)) specializes in the manufacture, distribution and support of high voltage components, assemblies and power supplies. Its three major product lines include HV Component Associates (HVCA), CKE, and High Voltage Power Solutions (HVPSI). The HVCA line of products centers on high voltage diodes, rectifiers, bridge rectifiers, and custom assemblies for specific applications. CKE products are a leading line of high voltage and high power silicon rectifiers, MOVs, selenium suppressors, silicon carbide varistors, ceramic disk capacitors, as well as custom assemblies. The HVPSI product line includes high voltage power supplies, multipliers and test equipment. Dean Technology's full family of products provides complete coverage of high voltage and high current solutions for any application. For sales and technical information Dean Technology can be reached at 732.938.4499.
