

FOR IMMEDIATE RELEASE

## Advanced Parametric Product Search

**December 19, 2017 – Addison, TX** - Dean Technology, Inc., today announced the introduction of advanced parametric searching for rectification products on its website at [www.deantechnology.com](http://www.deantechnology.com). This search feature allows users to filter all of Dean Technology's extensive rectification products by common technical specifications and package types allowing for very rapid identification of the correct product to meet specific needs.

The advanced product search function is an extension of the custom-built product database that is the heart of the Dean Technology website, and represents the next level of user experience for technical high voltage customers. The same feature will be extended to DTI's suppression and capacitor offerings in the coming months, as the company continues to invest in providing industry leading tools to support their customers.

"We've put a great deal of effort into designing our new parametric search feature," said Griffin Caruolo, Director of Marketing and Business Development for Dean Technology. "We were very careful to keep the design as simple as possible, while ensuring that our technical customers could get at exactly the kind of information they need, with as little delay as possible."

Dean Technology is committed to building best in class tools to support their customers in the design and use of their products, as represented by this new advanced parametric search. They also have dedicated engineering support on staff to help with any technical detail customers might require. The new search feature, and information on all of the standard products offered are available at any time at [www.deantechnology.com](http://www.deantechnology.com).

### **About Dean Technology, Inc.**

Dean Technology, Inc. ([www.deantechnology.com](http://www.deantechnology.com)) is an ISO 9001:2015 certified company that specializes in the manufacture, distribution and support of high voltage components, assemblies and power supplies. Its three main product lines include HV Component Associates (HVCA), CKE, and High Voltage Power Solutions (HVPSI). The HVCA line of products centers on high voltage diodes, rectifiers, bridge rectifiers, ceramic disk capacitors, and custom assemblies for specific applications. CKE products are a leading line of high voltage and high power silicon rectifiers, MOVs, selenium suppressors, silicon carbide varistors, as well as custom assemblies. The HVPSI product line includes high voltage power supplies, multipliers and test equipment. Dean Technology's full family of products provides complete coverage of high voltage and high current solutions for any application. For sales and technical information Dean Technology can be reached at +1.972.248.7691.
